Why can't I mount direct...?

Many Valve manufacturers, particularly in the High Performance Butterfly Valve sector, recognise the benefits of a direct mounted actuator. However, most heavy duty actuator manufacturers cannot accommodate this facility within their product range.

[Flowbus](#) can offer the yoke boss pre-machined to match the Valve shaft and the multi-drilled ISO pad often matches the "F" number of the Valve (because the choice of "F" number is dictated by torque for both Valve and Actuator).

For more information on direct mounting Scotch yoke heavy duty actuators, contact Ascendant Technologies on +44 1495 767210 or info@ascendant-technologies.com

Recent Flowbus Project Wins...

1) The Guizhou Ammonia Project in China, Heavy Duty Spring Return Actuators to operate ANSI 600#, 1500# Ball valves within five sec in Upstream Oxygen Line.

2) CS Plant project from Tosho Co., Ltd (Japanese Chemical Company) through Toyo Engineering. Heavy Duty Spring Return Actuators to operate ANSI 150, 300# Butterfly valves

3) SHIN Nippon Machinery for Steam Turbine line. Specially designed Quick Acting Pneumatic Spring Return Actuators (operating with in 0.5 sec.) to operate Butterfly Valves.
